Chrétien van Veldhuizen

Frontend developer - Bridge between man and machine

A bridge between man and machine, that's me! As a software developer with a focus on Frontend, TypeScript, process optimization, AWS and communication, I ensure the perfect user experience. Delivering high quality code in for example TypeScript and Angular gives me energy. I am a real team player who can easily communicate with other areas of expertise. From meetup organizer to software engineer, I am the bridge between man and machine.

Character

Proactive
Structured & Analytical
Transparent
Curious
Studious & Passionate
Helpful & Team player
Social

Expertise

Software development with a focus on Angular, JavaScript, TypeScript, AWS, Python, DevOps, Git, JSON, REST, Azure DevOps.

Certificates

- AWS Certified Developer Associate
- AWS Certified Solutions Architect Associate
- AWS Certified Cloud Practitioner
- Professional Scrum Master 1
- TMAP: Qualiity for cross-function teams
- Front-end JavaScript Frameworks Angular
- Front-end Web UI Frameworks and tools: Bootstrap 4

Interests

In my spare time I enjoy strategy and socializing. This is expressed in board games, a fanatic follower of formula 1, special beer, code wars, and gaming. I also love to exercise, to regain energy!

Most recent experiences

Software Engineer
09-2019 - current

Sogeti Nederland - General Services

Technique: Angular, JavaScript, HTML, CSS, Python, TypeScript, AWS

I have a broad technical background, with knowledge of Frontend development and the cloud. Currently I am focused on software development.

Cloud engineer
09-2020 - 03-2022

AEGON NV - Insurance

Technique: Python, TypeScript, Azure DevOps, AWS, GIT, REST, JSON, HTML, CSS

Responsible for developing a cost dashboard, cloud audits, development of Hawkey (Aegon specific AWS security tool), assisting Aegon teams with migration plans and cost analysis in AWS. I combined applied my frontend knowledge to combine infrastructre and websites during the aegon innovation sprints.

Frontend developer
05-2020 - 08-2020

InnoSportLab de Tongelreep - Healthcare

Technique: Ionic, TypeScript, HTML, CSS, JSON, REST, AWS

Responsible for the connections with the backend, login function in combination with AWS cognito, form fields and validation. I quickly saw the similarity of Ionic with Angular. This ensured a high development speed of the project.

Frontend developer
12-2019 - 05-2020

Sogeti Nederland - General Services

Technique: Angular, GIT, TypeScript, HTML, CSS, AWS, JSON

Responsible for the development of SoPickMeUp, the carpool web app for Sogetisten. Creating components, forms, login functions, services and the connection with the backend. I was also scrum master for this team.

Education

Communication & Multimedia Design
2015 - 2019

The Hague University of applied Sciences - Bachelor of Sciences

Focus on UX/UI and frontend. With minors in psychology, usability expert and design for user experience. Many assignments form real companies during my education such as: Ben, ANWB, Studielink, Glasnet.

Side activities

Frontend core team member & IFT team & YMT peergroup
05-2020 - current

Sogeti Nederland - General Services

In the Young Management Team peer group I give my opinion on topics related to Young Sogeti. IFT team organizes drinks with presentations every 2 weeks on Friday. At the Frontend core team I am responsible for the meetups and development of Frontend in the interaction community.

Active member of the Education committee
08-2015 - 01-2017

Communication & Multimedia design - The Hague University of applied sciences

Commision to enhance the classes, process and the education for the coming years.
